Annual Report of the Executive

Accepted by the National Council at its Annual Meeting held at the North British Station Hotel, Edinburgh, on May 10th, 1922, at 2-30 p.m.

March, 1922.

Ladies and Gentlemen,

We have the honour to submit a report on the work of the year 1921, which is the second Annual Report since the formation of the National Federation of Launderers, Ltd.

Owing to the formation of various sub-Committees and the delegation to them of much detail work, it has only been necessary to hold three Meetings during the year, *i.e.*, on 9th February, 5th October and 8th December, as compared with six during 1920, but it is possible that we shall have to meet more frequently in 1922.

At 1st January, 1921, the membership of the Federation consisted of 1,398 laundries and 107 second members, a total of 1,505. During the year, 148 laundries and 9 second members were added to the membership roll. Resignations and cancellations for various reasons accounted for 93 laundries and 8 second members, leaving a net membership at 31st December, 1921, of 1,561.

In view of the state of trade generally and the effect of the Miners' Strike it may be considered satisfactory to show a net increase. Much of the time of our organising staff was devoted to establishing the British Launderers' Research Association, but now that has been successfully accomplished it is hoped that we shall extend our membership considerably.

For the last three and a half months of the year we have carried on with only two Assistant Secretaries. Mr. E. C. Boughton left us in the middle of September to take over the General Secretaryship of the National Federation of British Growers, and it was thought wiser not to attempt to replace him immediately. It has been found, however, that the work cannot be accomplished efficiently with this reduction in man power, and consequently the staff will probably be increased at an early date.

The Federation Journal has further consolidated its position as an important element in our work. It has been very encouraging to receive frequent messages of congratulation on and thanks for the information contained in its pages. No effort has been spared to make the Journal interesting and useful, and to keep it up to date.

We published our first Annual Handbook at Midsummer. It contains so much useful information that every member should keep it on his desk for ready reference throughout the year.

After events have proved that it was possible for the wit of man to devise means of at least attempting to get round the injunction of the High Court in the matter of the Fulham Municipal Bagwash Laundry. As soon as satisfactory evidence could be obtained an application was made for a Writ of Sequestration against the Fulham Borough Council for what was thought to be a breach of the injunction. The case came before Mr. Justice Sargant on the 16th of December, 1921, when the application was granted. Consequently, this excursion into Municipal trading has now come to an end.

The work of the Laundry Trade Board has made constant demands upon the time and thought of many members of the Executive, as well as on the staff of the Federation. There have been six meetings of the Board, which, with the preliminary meetings of the Employers' Side, have averaged three days each. In addition there have been numerous Committees of the Board. It is satisfactory to find that now the cost of living is decreasing the Trade Board Rates are coming down also.

WHEN you've found what you want is what PIMBLETT's have got,
Then the getting is easy enough. is it not?
A post card, a letter, a ring, or a call,
Your part is then done, that's easy an' all.

There are few if any of your Laundry wants we shall not understand.
Few also of the various items you may find called for, that we have not actually in stock.

It might have been thought that in these circumstances the work of the Industrial Commissioner's Department would be practically at a standstill, but that has not been the case.

We draw special attention to the report of the Fabrics Investigation Department, which it will be seen is the hardest worked Committee in connection with the Federation. Not only has the number of cases increased three- (or four-) fold, but the character of the work has developed. The preliminary negotiations in connection with what may be called the "Guaranteed Fabrics" Campaign are most important, and when carried to a successful conclusion, as we believe they will be in the near future, should be of the utmost value to the Industry.

Our Congress at Buxton, held June 6th to 10th, 1921, was successful in spite of the Miners' Strike. The fact that in spite of the difficulties of travelling we obtained an attendance of about 150 is an indication of the hold these gatherings have obtained on our members. At the same time we regret that such a small proportion of the total membership has been attracted up to the present. We hope, however, through the District Conferences which are now being held in different parts of the country, to prove the practical value of the Congress to all Members, and to ensure a much larger attendance at our annual gathering.

The 1922 Congress is unique in that Edinburgh has been selected as the venue, *in response to a pressing invitation from our Scottish Members* to meet in that part of the country. It will mean a long journey for our southern members, but we feel confident that the beauties of that famous city and the well-known hospitality of Scotsmen will attract a record attendance. The Congress will be held from May 8th to 12th.

The two Northern Districts at York, the Midland District at Birmingham, and the County of Kent at Canterbury have all succeeded in holding thoroughly useful and successful conferences. Similar meetings will be arranged in other parts of the country during 1922.

Though progress has been made with the intensive organisation of the country a good deal remains to be done in some districts. Attention is being concentrated on the backward areas so far as routine work will allow. We must not be satisfied until every Section is functioning efficiently and each District Council a live part of the organising machinery.

The Revenue Account for the year is much more satisfactory than that of last year. To show a surplus at the end of the second year, after paying the expenses of formation and preliminary organising, proves the wisdom of the re-organisation scheme. The attention of members is drawn to the reduction in certain items of expenditure (regarding which fuller information will be found in the Report of the Finance Committee)and also to the payment of Income Tax to the Inland Revenue. It is because of this payment that members are entitled to include their subscription to the Federation as a trading expense. We trust that the balance in hand is only the nucleus of a substantial Reserve Fund.

The Louth Fund has been brought to a satisfactory conclusion and the balance referred to in our last report handed to Mr. Winton. There is no doubt that the help rendered in this case was invaluable.

The Southport Strike Fund was completed through the two Northern Districts.

Several Corporation Bills of an omnibus nature have passed through Parliament, all of them containing the clause regarding infectious diseases approved by the Federation some years ago.

The Metropolitan Water Board (Modification of Charges) Bill was amended in Committee in order to retain the sliding scale of charges, though on a somewhat higher

basis. We lodged a petition against the Bill in its original form, but it was not found necessary to appeal by Counsel, owing to the action of other important bodies whose interests were the same as ours.

We have appointed Mr. John Booth as Hon. Official Valuer to the Federation on terms which should be very satisfactory to our members. We attach great importance to this appointment, and we strongly recommend members to engage Mr. Booth's services.

During the year it has been necessary to protest to several advertisers against wording adversely reflecting on laundry methods, and we are gratified to report that in nearly all cases the words complained of have been withdrawn immediately.

There has been a refreshing change in the attitude of the general press, and, though much remains still to be done, substantial progress has been made in the desired direction. The subject of Collective Publicity has been prominently before the Industry during the year, and since the discussion at the Buxton Congress interesting developments have taken place. Pride of place must be given to the Royal Counties Section for setting the pace with their weekly educational articles, but we understand other sections are likely to follow their example shortly. Meantime numerous short articles have appeared in different papers.

We have made a commencement with a National Campaign in the form of our Customers' Pamphlets. We had hoped that all our members would have taken up this scheme, but perhaps that was rather too much to expect. Nevertheless, to have sold 359,290 copies of No. 1 and 190,787 copies of No. 2 is not at all a bad start. Doubtless the movement will gain momentum during 1922. It is worthy of general support.

In due course we must have a National Press Campaign, but that is a costly business and to be effective must be on a large scale. With it could be linked a Cinema Scheme, but that again would require more money than we have available. But these developments are only delayed temporarily, not permanently set on one side. We are convinced of the necessity of putting before the public prominently and persistently the facts of the Laundry Industry. It must be done, but it cannot be done without heavy expenditure.

We take some credit for the successful launching of the scientific research movement in the form of the British Launderers' Research Association. The idea sprang from the Federation, it was brought to fruition by the work of our staff, and with two exceptions (and the Irish contributions) the whole of the subscribed income has been provided by members of the Federation. We shall watch with great interest the progress of this important offshoot from the Federation.

The Committe appointed at the Buxton Congress to carry into effect a plan for the exchange of Costing and Output figures has completed the first portion of its work, and the exchange commenced during January, 1922. It is hoped that this experiment will prepare the way for an official Costing System.

For other details of the work of the year we refer you to Minutes of Meetings and the Reports contained in the Federation Journal. It has been a busy year and a difficult one. We have done our best for the Industry as a whole, as well as for the Members of the Federation, and we trust that our efforts have been appreciated.

We desire to place on record our great appreciation of the services rendered during the year by the whole of the members of the staff. They have worked strenuously and with enthusiasm.

Yours faithfully,

G. D. DENSHAM, *Chairman.*
J. J. STARK, *General Secretary.*

ANNUAL REPORT OF FINANCE SUB-COMMITTEE.

GENTLEMEN, MARCH, 1922.

The accounts for the year 1921 seem to call for little comment except to emphasise the fact that for the first time in the existence of the National organisation there is a substantial surplus on the year's work. Even after writing off the whole of the adverse balance (which includes the formation expenses of the new Federation) there still remains a balance on the right side.

We are of opinion that we should aim at accumulating a substantial cash reserve (so far as that can be done without loss of efficiency) for use in case of emergency.

On the items of the Revenue and Expenditure Account we have to say:—

(1) Though the subscription income is larger than for 1920, we had hoped it would have been even more. The Miners' Strike in particular, and the bad state of trade generally, rendered it necessary to cancel quite a number of subscriptions. It is hoped to show a further substantial increase for 1922.

(2) The small increase in Salaries and Wages is accounted for by the fact that our two Assistant Secretaries, who came to us about the middle of 1920, have been on the staff during the whole of 1921.

(3) Variations in certain items largely balance and explain themselves. For instance, though Canvassing and Organising Expenses show a decrease of £170 odd, Trade Board Expenses are £120 more. This is because journeys undertaken in 1920 with the object of obtaining new members and developing our organisation were during 1921 replaced to a certain extent by investigations etc., for Trade Board purposes.

(4) It is very satisfactory to find such a substantial decrease in the cost of Labour negotiations.

(5) Sectional Petty Cash Expenses are down £290, an improvement we welcome very much. There are still a few Sections in which the expenses are very high, and these are receiving attention, but as a whole we cannot expect to reduce this item in the aggregate. In fact, we fear that in some areas the reduced expenditure arises from lack of activity—a false kind of economy—which we hope will be altered during 1922.

(6) The increase in the Expenses of District Councils is caused by a few more Meetings. This item may be expected to be a little heavier for 1922, because two or three District Councils which hitherto have not functioned effectively will probably begin to work.

(7) The increased cost in the Fabrics Investigation Committee is explained by development, of which details will be found in the separate Report of that Committee.

(8) There is a distinct improvement in the Publications Account, including the cost of the Federation Journal. Considering the size and usefulness of the Journal, and the quantity of other printed matter sold to members cheaply, we think this department shows well. Special efforts are being made during 1922 to make a further improvement. The practical disappearance of the loss on the Congress was the result of not publishing the Report in a separate volume. The Lectures appeared in the *Federation Journal* and we do not think this economy reduced efficiency, but this item should be taken with the cost of publications for the past two years for comparative purposes, thus showing a larger saving on Publications than appears on the surface.

It must be remembered also that the Journal is a vehicle for conveying information to members, much of which would have to be issued by circular if the Journal were not published. Hence it reduces the postages and correspondence expense items.

HORROCKSES, CREWDSON & CO. LTD., 107, PICCADILLY, MANCHESTER

(9) The Publications Account represents a much larger turnover than the net balance shown in Revenue Account. It is made up as follows:—

Cost of printing and distributing the Federation Journal	£1,209	7	10
Sale of 61,300 slips and printed matter of various kinds	549	15	2
Sale of 359,290 copies of No. 1 Customers' Pamphlet	276	17	7
Sale of 190,787 copies of No. 2 Customers' Pamphlet	102	8	1

Taking these figures into account the actual cash turnover for the year is £2,138 8s. 8d., more than the total of the Revenue Account.

(10) It will be observed that we have taken credit for £75, subscriptions outstanding on 31st December, 1921. Nearly the whole of this amount has been received since January 1st, 1922.

(11) It is unfortunate that we shall have to pay a substantial amount to the Inland Revenue, on the surplus Revenue, but it must be remembered that by agreeing to this course we have enabled members to charge their individual subscriptions to the Federation as a Trading Expense for Income Tax and Corporation Profits Tax purposes, thus saving members a large sum of money in the aggregate.

On behalf of the Committee,

T. TAYLOR, *Chairman.*
E. JACKSON, *Treasurer.*
JAS. J. STARK, *Secretary.*

ANNUAL REPORT OF THE FABRICS INVESTIGATION COMMITTEE.

FEBRUARY, 1922.

GENTLEMEN,

We have pleasure in reporting upon our work for the twelve months ending 31st December, 1921.

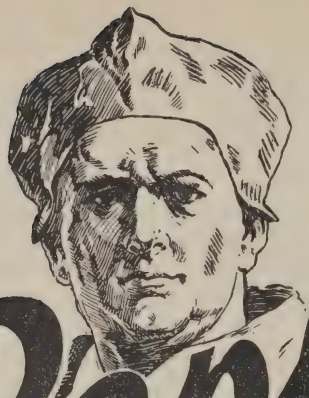
The analysis of cases (see below) shows a very large increase in the work of this Department. It is interesting too, as showing to what a large extent Manufacturers are to blame for the trouble experienced by Launderers:—

Analyses have been made of many well known materials commonly used by Laundries, and are available on application for the information of members.

We have held 35 Meetings, at which the attendances were as follows:—Mr. J. W. Akam, 27; Mr. W. Creeke, 21; Mr. G. D. Densham, 6 (ex officio); Mr. A. R. Frost, 32; Mr. J. R. Peers, 33; Mr. T. Taylor, 28; Mr. C. F. Townsend, 31. Some of these meetings have lasted a day.

If the work continues to increase as during the last few months, other arrangements must of necessity be made for carrying it on. Even at present, although quite willing to do all we can, the work takes up more time than we feel justified in devoting to it. On that point we may have some suggestions to make in the near future.

Arising out of the detailed examination of such a large number of cases we have been forced to a consideration of larger questions of principle. As a first step to a full understanding of certain problems we visited the works of Messrs. Wolsey, Ltd., Leicester; Cartwright & Warners, Loughborough, the makers of Squirrel Brand Hosiery; and (by invitation of the Research Committee of the Calico Printers' Association) Printing and Bleach Works near Manchester, and Spinning and Weaving Mills at Ashton-under-Lyne, and the Woollen and Cotton Mills of Messrs. J. Kenyon & Sons, Ltd., Bury.



Replaced if it shrinks!

Tell Your Customers

that if any Wolsey Garment Shrinks in Washing, they get a new Garment free of cost.

They will thank you, and you will be able to thank yourself, for Wolsey Unshrinkable Garments save the Laundries a world of worry and argument, and help you to retain your customers' confidence.

Behind that Guarantee of free replacement should a garment shrink stands the largest and oldest-established firm of woollen-underwear manufacturers in the world, a firm who may be relied upon to interpret their Guarantee not only with fairness, but with generosity.

You will be doing a service to the public, to us, and to yourself by advising your customers that so far as their Underwear is concerned, they will have no trouble with the Laundry if they will only pin their faith to the brand which bears the well-known Wolsey Trade Mark.

WOLSEY

PURE WOOL UNDERWEAR

Sold in weights, sizes and qualities, for Men, Women and Children.

WOLSEY LTD LEICESTER

We have also met in conference deputations from the National Association of Outfitters, and the Research Committee of the Calico Printers' Association.

These discussions have confirmed our opinion as to the urgent necessity for co-operation between Laundryowners and members of the retail trades, in order to discourage the manufacture and sale of unreliable fabrics.

It is also advisable to come to some working agreement with the manufacturers, so that on one hand there should be some kind of guarantee regarding the fabric offered for sale, and, on the other hand, a standard formula for washing both coloured and woollen goods which would ensure the manufacturer fair treatment in the laundry. Some progress has been made in this direction both with the National Association of Outfitters and the Calico Printers' Association, and we hope that before long a definite arrangement will be arrived at.

The Story of the Federation.

The combination of Associations known first as "The Federated Laundry Associations" was founded on 25th September, 1900, and its first Meeting was held on March 21st, 1901. The title was altered to "Federation of Laundry Associations" on the 22nd of May, 1901. "The National Federation of Laundry Associations Ltd." was registered as a Company limited by guarantee on the 14th of November, 1912. The Capitation Fee of 1/- per individual per annum was increased to 10/6 in the year ending 30th April, 1915, and again increased to 21/- in the year ending 30th April, 1919.

As from 1st January, 1920, "The National Federation of Launderers, Limited" came into being, the actual registration of the Company being on 20th July, 1920. At the same time the previous Federation went into liquidation and the various federated Associations were dissolved as required by their respective constitutions. The basis of membership of the new Federation was made an individual one, the rate of subscription being 3/- per worker per annum, with a minimum of £2 2s. 0d. and a maximum of £31 10s.

THE NATURE OF OUR WORK.

Protective. This side of our work is inevitably of a fluctuating character. At times we have to concentrate the greater part of our energies upon it, whereas at other times there is nothing in hand. At the time of writing these notes we are faced with a revision of the law regulating Workmen's Compensation. This is a very important matter, which will have a material effect upon the premiums charged for this class of insurance. We are now in consultation with other organisations of Employers and the Home Office.

Before long a revision of the Factory Acts may be expected. We understand that a new Bill has been in draft for a long while. When it is proceeded with it will require most careful scrutiny from our point of view.

These are only mentioned as illustrations of the kind of work which falls to our lot from time to time. We have to hold a watching brief all the time and be ready for anything that may come along. Many people consider this defensive work to be sufficiently important alone to justify the existence of the Federation, apart from our other activities as described below.

Services. Members use us increasingly in a consultative and advisory capacity. To the average member one of the greatest attractions of the Federation is the knowledge that he can rely on obtaining information, both legal and semi-legal, on any of the numerous problems with which he is confronted. A large proportion of our heavy correspondence arises in connection with this branch of our work. The exact meaning and application of the numerous Government Orders and Regulations (Trade Board, Welfare Order, Factory Acts, etc.) prompt many enquiries. Disputes with customers, practical questions as to methods of washing, how to remove stains, costs of production, individual and departmental output, etc., etc., are all subjects on which we have been called upon to express opinions during the last few months.

Publicity has been interesting many recently, and in addition to the collective publicity which is dealt with on another page, we have assisted individuals in the drafting of their own advertisements and the preparation of advertising campaigns.

We continue to act for members on request in the case of claims by customers for compensation, and invariably have been able to arrange satisfactory settlements.

As will be seen from the Annual Report of the Executive, we are just commencing a Technical Advice Department, through which we shall be able to make thorough investigations of Laundries and to give reports thereon. The experimental work of this kind which has been undertaken has shown the possibilities of work of such a nature.

Constructive. The B.L.R.A. has now become a separate body, but it will be as impossible as it would be undesirable to separate entirely two organisations whose interests are so closely intertwined. We shall look forward to close co-operation, while confining knowledge of the discoveries made to members of the Research Association.

Our Collective Publicity Campaign has developed during last winter. The Customers' Pamphlets were admittedly an experiment, and, although they were not taken up so widely as we had hoped, a very useful start was made. We shall carry this movement further during the coming months, and in the light of experience now gained we shall hope to produce pamphlets which will be more popular than those yet issued.

In future we hope to find time to give more attention to the general press. There is much to be done in this direction which will help the Laundry Industry as a whole, but until we are able to spend something substantial nothing startling can be accomplished. The Model Laundry we arranged in connection with the *Daily Express* Woman's Exhibition held at Olympia during July should do a great deal of good by way of educating the public. It may lead to similar exhibits in other parts of the country.

The Annual Congress is now part of our ordinary routine, but the shorter local Conferences have also become as popular as they are useful. In addition to the Northern Conference, commenced three years ago, we have similar annual gatherings in the Midlands, South Wales, London and Home Counties (two—one in the south and the other in the north-western part of the district), while the South Western Counties and East Anglia have decided in favour of half-yearly gatherings. This is very satisfactory, but it throws a great deal of additional work on our organising staff. Nevertheless, it is well worth while. The educational value of such gatherings is incalculable. Another great advantage is that they strengthen the local organisation and bring the officials into close touch with individual members.

The Exchange of Statistics comes under the general description of constructive work, but it is dealt with elsewhere.

Other kinds of work are taken up as the necessity arises and the opportunity occurs. A Committee of Enquiry into the possibilities of Superheated Steam has been in existence for a year and will shortly issue a report. Another Committee of Enquiry into Alternative Services was appointed by the National Executive on June 1st, 1922. It is in matters of this kind that our work may be expected to develop in future. Hitherto the greater part of our time and energy has had to be devoted to building up an organisation big enough to take care of really useful constructive work. Now that has been done we can commence what is the real work of an employers' federation.

THE ROLL OF HONOUR.

The first President of the Federation was Mr. Hugh Trenchard, J.P., who held office from 1901 to 13th November, 1917. The Second President was Mr. D. E. Benson, who took office on the resignation of Mr. Trenchard, and became the First President of the new Federation. He was succeeded by Mr, W. Bird, J.P. on the 22nd of July, 1920, and Mr. Bird gave way to Mr. Councillor G. D. Densham during May, 1922.

Fabrics Investigation Department.

The work of this Department continues to grow. In addition to the increase in the number of cases dealt with during 1921 there has been a further substantial increase during the early months of 1922.

The reports of the examinations made are valuable in themselves and are one of the most appreciated services rendered by the Federation to its Members, but it is what arises from the large number of cases that constitutes the national importance of the work. By the compilation of statistics based on hundreds of cases we are able to arrive at general conclusions which indicate the necessity for large scale developments of great importance to the whole industry.

A striking illustration of this principle is the Guaranteed Fabrics Campaign which is now being negotiated. Our activities in this direction have attracted a great deal of attention and, though the plans for a big movement have not yet matured, the effect of the publicity obtained is to be seen in the large increase in the number of fabrics which are now offered for sale with guarantee of either fastness or unshrinkability.

Many retailers, particularly Gentlemen's Outfitters, have come to realise not only that it is neither fair nor safe to blame laundries indiscriminately, but that the best interests of retailers and launderers are identical. This alone is a great gain to our Industry. Retailers who persist in blaming the laundry without reason must be taught that such a policy does not pay them.

It is very important that all our Members should make a practice of discovering the real cause of any alleged damage to fabrics. There are still traces of the old-fashioned habit of giving compensation for the sake of satisfying a good customer without going closely into the real cause of the trouble. Such a course may settle an individual dispute but it is harmful in the long run.

The Federation is quite prepared to deal with retailers in matters of this kind. It pays a national organisation like ours to take considerably more trouble because of the principle involved, than it does the individual launderer.

A study of the analysis of cases submitted shows the impartiality of the Fabrics Investigation Department. The members of the Committee do not endeavour to white-wash the laundry, but to give a true verdict on the case submitted.

Members are reminded that they are entitled to send ten queries a year free of charge to the Fabrics Investigation Department. In order to save time and correspondence and to enable the Committee to understand thoroughly the cases they have to adjudicate upon, full particulars should be sent with each article.

The following details are required:—

(a) Approximate degree of hardness of water.
(b) Actual names of washing materials used and duration of various washing processes.
(c) Actual amount by weight of alkali and other materials used in proportion to actual amount by weight of soap used (as for example $2\frac{1}{4}$ lbs. 58% alkali to 1 lb. 63% Fatty Acid Soap).
(d) Name of bleach of other materials (if any) and quantity used.
(e) How is bleach or other materisls used.
(f) Methods of drying (for cases of shrinkage).
(g) If put through a mangle or calender.
(h) Whether washed by hand or in a machine and approximate temperature of water and drying room (in the case of flannels and coloured goods.)
(i) Length of time in Hydro Excractor, and type and speed of washing machine if washed in a rotary (flannels).
(j) Period (in months or years) for which the laundry has been responsible tor washing the particular article and approximate age of the article.
(k) Any other details likely to help the Committee.

Our Honorary Official Valuer.

Mr. John Booth was appointed Hon. Official Valuer to the Federation as the result of reports to the Executive of the very useful work he had done for certain well known Launderers. As a result of discussions we were able to arrange specially favourable terms with Mr. Booth for members of the Federation.

Mr. Booth's special work is to make Inventories and Valuations of laundries for purposes of insurance. Incidentally such independent valuations of buildings, plant and equipment are very useful for Balance Sheet purposes, but they are invaluable in the event of fire.

If anyone doubts the necessity let him endeavour to make from memory a complete list of the contents of his laundry. Then let him go through his plant and check it. That little test will show how difficult it would be to make a complete and detailed claim in the event of a fire.

Those who have availed themselves of Mr. Booth's services in this matter all report enthusiastically on the results and advise everyone else to follow their example. The possession of a detailed Inventory prepared by an independent and skilled valuer gives a feeling of security that is worth a good deal. It also enables one to insure the correct amount. It is surprising how many people are either over or under insured.

Mr. Booth's charges to Members are in accordance with the following scale:—

For making Valuations of Buildings, Plant, Machinery, etc., for Fire Insurance and other purposes; supplying Summary of Valuation and Schedule of Insurance; taking detailed Inventory and supplying loose leaf typewritten copy in binding cover:—

Inclusive Fee:—Covering all out-of-pocket expenses, including railway fares and hotel expenses:—

$\frac{3}{4}$	per cent. on the first	£3,000
$\frac{5}{8}$	,, ,, ,, ,, next	£2,000
$\frac{1}{2}$	,, ,, ,, ,, ,,	£2,000
$\frac{3}{8}$	,, ,, ,, ,, ,,	£6,000
$\frac{5}{16}$	,, ,, thereafter.	

A reduction on the above scale for all Members of the National Federation of Launderers, Ltd. of 20% where the account is paid within 28 days of rendering same.

Depreciation.

Special Rates for Depreciation of Laundry Machinery, etc.

The special allowance of $3\frac{3}{4}$% ceased in April, 1921. Our efforts to obtain a renewal of this war time concession were not successful.

Therefore the original arrangement made with the Board of Inland Revenue is now in operation. It is as follows:—

Plant and Machinery, including Engines, Boilers, and Shafting	$7\frac{1}{2}$%
Motor Vans	20%

Both rates are on the written down value from year to year.

When any Plant or Machinery is replaced owing to obsolescence, the written down value of the superseded machine will be allowed as a charge against Revenue.

We still hear occasionally of cases in which Surveyors of Taxes do not appear to have knowledge of these special arrangements. When members experience difficulty in obtaining the correct allowances, the matter should be reported to Bank Chambers.

Exchange of Figures of Cost and Output.

The experimental exchange of costs which was conducted from our Blackburn branch office has now become a permanent and official feature of our work. As from January 1st, 1922, this department was taken over by the Head Office. At the moment about sixty people are joining in the Exchange. We have commenced grouping the returns by districts. Later on, when the numbers increase, we hope to group according to size and type of Laundry as well.

The importance of this movement cannot be exaggerated. Those taking part in it say that it has enabled them to effect substantial economies in working. The variations disclosed in both costs and output are very marked, and indicate the possibilities of of standardisation.

The Procedure is as follows:—

1. We supply a schedule which has to be filled up and returned by a stated day each month.
2. The returns received are then tabulated, twenty on a sheet, and printed.
3. The tabulated sheet containing this return is then despatched to each participant, together with a blank form for the next month's return.
4. The charge to each person is 3/- per month, which barely covers the cost of printing.
5. Each set of figures is published under a reference number, so that strict anonymity is preserved.
6. Enquiries as to the reasons for favourable figures in any Return are encouraged and dealt with by the staff without disclosing the identity of the enquirer or the enquiree.
7. The figures are given in such a form that no one can tell the turnover of any Laundry.

Thus this Exchange is complete in itself and extraordinarily valuable. We believe it is the precursor of a much more comprehensive scheme, for it teaches the advantages to be gained from a system of scientific cost accounting. The Committee has not lost sight of this possible development, but the time is not yet ripe for it.

We strongly advise all our members to obtain full information. The first month's return may cause a little trouble, but afterwards it is comparatively easy. Those who are joining in the Exchange say it is well worth the time and trouble involved in extracting the figures.

SUBSCRIPTIONS TO THE FEDERATION AND THE RESEARCH ASSOCIATION—A Legitimate Charge Against Revenue.

The Federation has signed a contract with the Inland Revenue authorities agreeing to the assessment of its surplus income for Income Tax purposes, in return for an undertaking that subscriptions of members to the Federation will be allowed as a trading expense.

The Department of Scientific and Industrial Research has made an arrangement with the Inland Revenue Authorities whereby individual subscriptions to all approved Research Associations will be allowed as a trading expense.

Therefore any launderer who has an objection raised to the inclusion of either of these items in his Trading Account, should report the fact to Bank Chambers, when the necessary instructions will be given to the Surveyor of Taxes concerned.

Laundry Trade Board.

The Laundry Trade Board appears now to be an established institution. Those who are not in close touch with the work may be forgiven for thinking that its operations are limited to the regulation of wages. This is far from being the case, as the following facts will prove.

There is a small Sub-Committee for dealing with questions of scope. The Ministry of Labour receives frequent enquiries as to whether particular workers are entitled to receive the Trade Board rate of wages. All such cases are referred to this Sub-Committee and it will be readily understood that the work is very important and frequently of a puzzling character.

A special Committee which was originally appointed to deal with the problem of Institution Laundries has been at work for some time and its terms of reference have been extended to include the question of cottage laundries. These two subjects are very complicated. The evils are admitted, but so far no one has discovered a way to overcome them.

There is a small Sub-Committee also which deals with the numerous applications for permits of exemption in the case of physically or mentally defective workers. That Committee meets on an average once or twice a month.

We desire to draw special attention to the necessity for strict compliance with the obligations of the various Orders immediately they come into operation. In the course of our work we come into touch with some cases in which the employer thinks he is safe in sailing rather close to the wind, relying upon the Trade Board Inspector, if and when he visits his laundry, to put him right. We hear of still more cases from the Inspectors' Department of the Ministry of Labour. We strongly advise against this happy-go-lucky method. If any number of workers have been paid less than the rate, the arrears total to a considerable amount. Further, there is always a serious risk of prosecution and consequent heavy fines in addition to the arrears. Members who are in doubt as to what their exact obligations are in this matter would be well advised to consult the General Secretary of the Federation rather than run the risks above mentioned.

The names of the Employers' Representatives are now well known. Mr. D. E. Benson, of Southport, is the Chairman; Mr. J. J. Stark, the leader; and Mr. W. Crabtree the Secretary. Certain members have resigned, but the vacancies have not yet been filled. We are expecting to be asked to make fresh nominations at an early date. As soon as these nominations have been made and accepted the necessary information will be given in the *Federation Journal*.

As a result of the Lord Cave Committee of Enquiry into the working of Trade Boards, it is anticipated that a revising Act will be placed before Parliament at an early date. Important alterations in the law are contemplated, but the exact nature of these alterations cannot be stated at the moment. Generally speaking the Employers' Side agree to the recommendations of the Cave Report.

Attention is drawn to the fact that as from the beginning of July the basic rate for Female Workers of 18 years of age and upwards is 7d. per hour. For Males the base rate of males of 21 years and upwards is still 1/1½ per hour.

Publications.

This is becoming quite an important part of our work. It is likely to grow still further in the near future. Special attention is drawn to the Gummed Slips, etc., reproduced below. They are all useful and can be used by most Launderers at one time or another.

The *Federation Journal* has now become thoroughly established as the recognised method of communication between the Head Office and its Members. In addition to information on current topics, it contains numerous articles of permanent value. Members will find it worth while to keep a complete file of the Journal. For this purpose a special binder with elastic attachment is supplied—price 3/— which holds twelve numbers; at the end of the year the volumes can be bound at small cost.

Customers' Pamphlets, Nos. 1 to 5.

The issue of these pamphlets was an experiment in collective educational publicity. The opinions received regarding these pamphlets have been very instructive and indicate the lines along which they should be continued. The matter is now receiving careful consideration and fresh pamphlets are in course of preparation. They will be advertised from time to time (though probably not monthly)in the *Federation Journal*. Meantime attention is drawn to the fact that some of the first five pamphlets are by no means out of date.

No. 1 "What Every Woman Ought to know about the Laundry," deals with the question of laundry prices, shewing that a reduction cannot be expected at the present time. In most districts this is out of date.

No. 2 "What the Public Ought to Know About the Laundry" describes various methods by which the customer can help the laundryman to provide an efficient service.

No. 3 "**Mems. for Men on Washing Day**" was an attempt to bring home to men in colloquial terms the hardship to women and the risk to their health occasioned by the weekly home washing day.

No. 4 "**On Shopping**" emphasizes the necessity for care in the purchase of fabrics and the advisability of insisting always upon a guarantee from the retailer.

No. 5 "**Spring is Here**" was a simple advertisement for special work likely to arise in the course of spring cleaning. This, of course, is no good until next Spring.

Of these, No. 4 should be useful to all laundrymen from time to time. Even though general distribution amongst the customers is not considered advisable, occasions will arise, especially when there is a dispute as to the loss of colour or something of that kind, when a copy of this pamphlet would be very useful.

No. 2 could also be used in the same way. For instance, when dealing with a claim for a missing article, a copy of No. 2, with paragraph 3 marked, should be helpful.

No. 3 should be effective with customers sending only a small proportion of their work to the laundry, and for use with prospective customers.

Various Gummed Slips.

We reproduce below several slips which are of permanent value. Every Launderer ought to have a supply of these slips in stock for use as the occasion arises. In the case of those numbered 3a or 3b and 31 or 31a, it would be wise to attach one to each customer's book or list, two or three times a year.

THE WASHING OF WOOLLEN, COLOURED AND SILK GOODS.

The attention of Laundry Customers is drawn to the fact that there is still a quantity of inferior material on the market. Colours are not "fast"; much of the wool is short fibred, if not actually "shoddy"; and artificial and weighted silk is also sold in large quantities.

In these circumstances it is often impossible for the Laundry owner, however careful he may be, to avoid shrinkage, loss of colour, or, in the case of artificial silk, holes in the garment, for which the manufacturer is responsible.

Therefore it must be distinctly understood that while every care will be taken to obtain satisfactory results, no responsibility can be undertaken by launderers for this class of goods.

COLLARS.

COMPLAINTS are sometimes made against laundries owing to collars having such a short "life." From careful enquiry it has been found that the usual cause of this is not careless or improper laundry methods but faulty manufacture. Inferior fabrics or combination of unsuitable materials are mainly responsible, and in these circumstances laundries cannot accept responsibility for unsatisfactory results (and need for rapid renewal) which are unavoidable in spite of the utmost care taken in redressing.

Published by the National Federation of Launderers, Ltd.,
No. 35. *162-7, Bank Chambers, 329, High Holborn, W.C.1.*

WARNING TO CUSTOMERS.

AN old form of organised fraud is being perpetrated again, and we desire to put our customers on their guard. Men are watching private houses to learn which Laundry is serving them, noting the day and time the carmen call. Having made themselves acquainted with these facts, the following week a member of the "gang" calls a few minutes before the regular time, stating that he is a new carman and asking for the account. Having obtained this he either takes away the soiled linen or promises to call back for it.

Customers and their maids should make sure that the regular carman calls, or, if a new man appears, insist upon some proof of his identity.

CURTAINS AND BLINDS.

It is common knowledge that the rays of the sun have a destructive effect on lace curtains and blinds.

As the sun was shining brilliantly for many more hours, and with greater intensity, during the summer of 1921 than in the average summer, it will be found that such articles in use last year have deteriorated much more than usual.

Curtains and blinds which have been in use are always an unknown quantity, because there is nothing to indicate before the cleaning process whether the fibres have been affected by exposure.

It is necessary, therefore, to remind the public that the custom of the laundry industry is to accept curtains at customers' risk only. At the same time, launderers exercise every care to give a satisfactory result.

Rules and Regulations for Customers.

NOTICE.

Our Customers' attention is directed to the following Terms and Conditions adopted by the National Federation of Launderers, Limited, upon which work is accepted, and the dispatch or handing of Articles to the Laundry will be deemed an acceptance of these conditions.

1 **Marking.**—All work received is usually marked with the Launderers' distinctive letter or figure in cotton or ink, but the Launderers will not be responsible for the loss of any article which is not already indelibly and distinctively marked with the owner's name in full.

2 **Listing.**—All articles sent to the laundry must be accompanied by a plainly written list, bearing the customer's name and address, or the Launderers will themselves supply a book on loan for the purpose, which must be sent with the work. Responsibility cannot be accepted for articles which are not entered on a list.

3 **Instructions.**—All communications should be in writing, as vanmen are directed not to carry verbal messages. **In no Circumstances should instructions be placed in the Washing Book** or enclosed with the work, as they will not in such cases be seen until the hamper or parcel is unpacked and it may then be too late to give effect thereto. Written requests for early delivery or other instructions relating to the work, should therefore be sent direct to the laundry or handed to the vanmen separately, and must arrive on or before the receipt of the work.

4 **Payments.**—All accounts are **Payable Weekly** and are due upon the receipt by the customer of Invoice or upon tender of the articles, and no credit is given unless special arrangements are made direct with the Launderers. Vanmen are not agents of the Launderers for the purpose of giving credit, and if goods are left as a matter of courtesy without special arrangements as aforesaid no precedent for credit must be understood.

Customers are particularly requested to obtain the Launderers' printed receipt for all payments made, as no other can be recognised.

The Launderers cannot accept responsibility for loss of cash sent in the parcel of linen, or for jewellery or similar articles which may be left on soiled clothes sent to the laundry.

5 **Lien.**—The Launderers shall have a lien upon any articles at any time in their possession for and to the extent of any amount owing by the Customer to the Launderers, **both in respect of work done upon such articles and in respect of any other work done for that Customer.**

6 **Errors.**—In the event of any error occurring particulars must be sent direct to the Launderers within seven days in order that the matter may be rectified as soon as possible, but this shall afford no ground for delay in the settlement of the account. Vanmen are strictly forbidden to make any deductions or allowances.

7 **Claims.**—Claims for loss or damage must be made in writing within seven days from the date of the alleged loss or damage. In the case of loss a full description ,and in the case of damage the article alleged to be damaged, must accompany the claim, and in both cases the list upon which the article is entered must be sent therewith. Claims cannot be entertained unless proof is given of the article having been sent to the laundry.

CLEMONS, MARSHALL & CARBERT

(Branch of the Yorkshire Dyeware and Chemical Co., Ltd.)

HUNSLET ROAD, LEEDS

LONDON ———— Langford Works, Goose Green, S.E.22

8 **Visitors and Staff.**—Work from Visitors or Staff can be accepted only on the distinct understanding that the Customer is responsible for payment, unless a written agreement is made to the contrary.

9 **Non-Liability.**—In accordance with the custom of the trade no responsibility can be accepted for damage to any article arising from defective manufacture, or adulteration, deterioration from wear, exposure, or other defects becoming apparent during treatment at the laundry.

10 **Stains.**—Stains are not removed except by special instructions and at owner's risk.

11 **Coloured Goods, Woollens, etc.**—The Launderers accept no liability for damage arising from fugitive colours, or shrinkage of unsuitable material.

12 **Curtains and Blinds.**—As curtains and blinds are so liable to become tender through storage for a long period in warehouses and shops, also by exposure to sunlight and atmospheric conditions, they can only be laundered at owner's risk.

13 **Insurance and Compensation.**—The Launderers undertake to make good any loss sustained by reason of goods being destroyed by fire while held in trust up to such an amount as they themselves receive from the Insurance Co. in respect of such goods, provided such loss is not recoverable under the Customer's own insurance policy. The Launderers will also award compensation for loss or damage caused by negligence to any article whilst in their possession.
In no case shall compensation exceed an amount equal to Twenty Times the amount charged for laundering any such article.
Provided always that the Launderers shall not be held in any way responsible for any article of exceptional, special or fancy value, unless the Customer's valuation of such article be written clearly in the list containing the entry of the same and the Launderers' attention be specially called to it in writing.

14 **Hampers, Boxes and Bags,** when provided and left, for the convenience of the customer, must be duly returned, otherwise a charge will be made for them.

15 **Infected Linen.**—Whenever illness of an infectious nature occurs in a Customer's household, care must be taken that no linen that has been exposed to infection is sent to the laundry before it has been thoroughly disinfected. Before sending any such linen a letter must be written to the laundry stating the facts and enclosing a certificate from the Doctor stating that the linen has been thoroughly disinfected. To send infected linen to a laundry is a breach of the Public Health Acts, and any person contravening is liable to a penalty of £5 on conviction.

16 **Unclaimed Linen.**—The Launderers will not be responsible for goods not claimed and paid for within two months from the date of being sent to them. After the expiration of six months from the date of receipt the Launderers shall be entitled to dispose of the goods to defray expenses.

Contracts with Customers.

By this time the legal meaning of the Rules and Regulations for Customers ought to be understood by all members of the Federation, but the matter is of such importance that a brief resume of the position should be included in this Annual Handbook, and thus be available for ready reference when required.

Frequently the discussion of this question is limited to the amount of compensation due in the event of loss of, or damage to goods, but it must be understood that the general principle of the existence of a contract between the launderer and his customer applies equally to every clause in the rules.

On the preceding pages we give the complete Rules as revised in the early part of 1922. Every launderer should see that the previous edition of the rules is replaced by the new set, and for this purpose we have printed them on gummed paper suitable for pasting on tc existing Washing Books.

It is most important that the launderer should be able to convince the Court that the attention of his customers has been drawn to these Rules. This matter is so important, in fact it is the basis of the contract, that we once again emphasise the necessity for having on the front cover of the Washing Book in heavy type the following words:—**All Work whether called for at Customer's Premises or brought by Customers to the Laundry is accepted only on the Terms and Conditions printed on the Cover of this Book.**

In the case of customers who will not use the official washing books (*viz.*, those who use their own private books or persist in sending lists on separate pieces of paper) gummed slip No. 31 or 31a (see page 41) should be fixed periodically in the books or to the lists against the total of the week's account.

Several cases have been reported to us in which at first sight it would appear that the Court has not upheld the existence of a contract, but on investigation we have been satisfied that the laundryman's case was not properly presented. We believe it to be of the utmost importance that in all Court cases on this subject the launderer should be legally represented, and in this connection we draw attention to the fact that the services of our Assistant Solicitor are available for this kind of work.

Certifying Surgeon's Fees.

Enquiries are received from time to time as to the fees which certifying surgeons are entitled to charge under the Factory Acts. They are as follows:—

1/- per person examined, with a minimum fee of 2/6.

That is, if three people are examined the surgeon gets 3/-; if one person, 2/6; and likewise if two people are examined he gets 2/6.

If the laundry is more than one mile from the certifying surgeon's residence a further 6d. for each complete half mile over the first mile is chargeable.

Young persons and children must not be employed without a certificate for longer than seven days if the laundry is within three miles of the certifying surgeon's residence, or for longer than thirteen days if the laundry is more than three miles away.

Are YOU paying more than is necessary for EMPLOYERS' LIABILITY INSURANCE?

In these days of necessary economy every employer of Labour should make sure that he is *not* paying more than is necessary to secure complete protection in respect of his many liabilities under the various Employers' Liability and Workmen's Compensation Acts.
Every proposal submitted to the "British Dominions" is considered absolutely on its merits, and where an Employer takes proper precaution and safeguards his Employees from Accident he is granted the advantage of lower premium rates.

You may be paying a premium far in excess of what is necessary. Why not let the "British Dominions" investigate and advise you as to the safest and most economical method for you to adopt?

Laundry Welfare Order.

The following is the text of the Laundry Welfare Order, Statutory Rules and Orders, 1920, No. 654, which came into operation on the 1st of June, 1920:—

In pursuance of Section 7 of the Police, Factories, &c. (Miscellaneous Provisions) Act, 1916, I hereby make the following Order for all factories and workshops or parts of factories and workshops which are laundries. Provided that paragraphs 3 and 5 of the Order shall not apply to laundries in which no mechanical power is used and in which not more than five persons are employed.

1. The occupier shall provide and maintain in good and clean condition, for the use of all persons employed in processes involving exposure to wet, suitable protective clothing, including waterproof boots or clogs, and also, for persons engaged in sorting soiled linen, suitable overalls or aprons with bibs, and armlets from wrist to elbow.

2. The occupier shall provide and maintain for the use of all persons employed suitable accommodation for clothing put off during working hours, with adequate arrangements for drying the clothing if wet.

The accommodation so provided shall be placed under the charge of a responsible person, and shall be kept clean.

3. The occupier shall provide and maintain for the use of all persons employed and remaining on the premises during the meal intervals a suitable messroom, which shall be furnished with (*a*) sufficient table and chairs or benches with back rests, and (*b*) unless a canteen serving hot meals is provided, adequate means of warming food and boiling water. The messroom shall be sufficiently warmed for use during meal intervals.

The messroom shall be separate from the cloakroom, and shall be placed under the charge of a responsible person, and shall be kept clean. Provided that, in the case of an existing laundry where there are structural difficulties in the way of such separation, the Chief Inspector of Factories may by written certificate (which may be revoked at any time) allow some other arrangment if satisfied that it provides suitable accommodation for the workers.

4. The occupier shall provide and maintain for the use of all persons employed suitable facilities for washing, comprising a sufficient supply of clean towels, soap and warm water, adjacent to where the work is done.

5. The occupier shall provide in readily accessible positions a sufficient number of "First Aid" boxes or cupboards.

Each box or cupboard shall be distinctively marked, and if newly provided after the date of this Order shall be marked plainly with a white cross on a red ground, and shall contain, besides any other medical appliances or requisites:—

(i) Suitable first-aid dressings for fingers, hands, feet or other injured parts.
(ii) Sterilised cotton wool.
(iii) Burn dressings (large and small).
(iv) Plaster—waterproofed on the outside.
(v) Ointment, a bottle of iodine solution and a bottle of sal volatile.
(vi) A copy of the First Aid leaflet issued by the Factory Department of the Home Office.

Nothing except appliances or requisites for First Aid shall be kept in a "First Aid" box or cupboard.

Each "First Aid" box or cupboard shall be kept stocked and in good order and shall be placed under the charge of a responsible person, who shall always be readily available.

A notice or notices shall be affixed in every workroom stating the name of the person in charge of the "First Aid" box or cupboard provided in respect of that room.

'CHERRY TREE'

ESTABLISHED 1870.

Contractors to Admiralty, War Office, etc.

The provisions of this paragraph shall not apply to laundries attached to hospitals, asylums, or other public institutions in which arrangements are provided for medical treatment of accidents and illness.

6. The occupier shall provide for all female workers whose work is done standing, facilities for sitting so as to enable them to take advantgae of any opportunities for resting which may occur in the course of their employment.

7. The occupier shall provide and maintain at suitable points, conveniently accessible at all times to all persons employed:—

(*a*) An adequate supply of wholesome drinking water from a public main or from some other source of supply approved in writing by the local authority of the district in which the laundry is situated, which shall be either laid on, or contained in a suitable vessel;

(*b*) (except where the water is delivered in an upward jet from which the workers can conveniently drink) at least one suitable cup or drinking vessel at each point of supply, with facilities for rinsing it in drinking water.

Each drinking water supply shall be clearly marked "Drinking Water."

All practicable steps shall be taken to preserve the water and vessels from contamination.

8. This Order shall come into force on the 1st June, 1920.

NOTES ON THE LAUNDRY WELFARE ORDER.

Special attention is drawn to the following obligations of this Order:—

CLAUSE 2. These regulations may be very harshly enforced, thus putting the laundryowner to considerable expense. Any member who thinks that the Inspector is making unreasonable requests should report the facts to the General Secretary of the Federation, who will take the matter up with the Factory Department of the Home Office.

CLAUSE 3. It should be noted that the obligation to provide a mess-room only applies in cases in which workers remain on the premises during meal intervals. There is nothing in the Order to compel laundrymen to allow their workers to take their meals on the premises. At the same time we advise that when there are workers who wish to have their meals on the premises, the necessary facilities should be provided. Otherwise there is danger that the Home Secretary may use the power he possesses to issue a Special Order in individual cases to compel the provision of a messroom.

A number of cases have been reported to us in which there have been differences of opinion between the Factory Inspector and the laundryowner as to what constitutes compliance with the clause regarding the provision of a cloak room separate from the mess room. We have taken these cases up with the authorities and on every occasion have been able to arrange a satisfactory compromise.

Attention is drawn to the fact that the provision of a first-aid box or cupboard is not only compulsory, but is in the interests of the owner as well as the worker. Frequently small accidents occur in which, if properly treated at once, no serious trouble ensues, If neglected at the time they may be very serious later, thus causing not only unnecessary suffering to the worker, but serious inconvenience and expense to the employer.

RE CLAUSE 6. The provision of baskets in the ironing or calender rooms does not constitute compliance with this clause. A few chairs placed in convenient corners is strongly to be recommended.

It is easy to forget the rule that "Each drinking water supply shall be clearly marked **'Drinking Water.'**"

Registration of Business Names Act, 1916.

Many people seem to think that this is one of the numerous war-time provisions which lapsed with the formal declaration of peace. This is a misapprehension. The Act is still in force and therefore should be complied with.

The following, being the main provisions of this Act, should be read carefully:—

(*a*) Every firm having a place of business in the United Kingdom and carrying on business under a business name which does not consist of the true surname of all partners who are individuals, and the Corporate names of all partners who are Corporations without any addition other than the true Christian names of the individual partners or initials of such Christian names:—

(*b*) Every individual having a place of business in the United Kingdom and carrying on business under a business name which does not consist of his true Surname without any addition other than his true Christian names or the initials thereof:

(*c*) Every individual or firm having a place of business in the United Kingdom, who, or a member of which has either before or after the passing of the Act changed his name except in the case of a woman in consequence of marriage:

Shall be registered in the manner directed by this Act. Provided that:—

(i) where the addition merely indicates that the business is carried on in succession to a former owner of the business, that addition shall not of itself render registration necessary; and

(ii) where two or more individual partners have the same surname, the addition of an "s" necessary at the end of that surname shall not of itself render registration,

Every firm or person required under this Act to be registered shall furnish by sending by post or delivering to the Registrar at the Register Office in that part of the United Kingdom in which the principal place of business of the firm or person is situated a statement in writing in the prescribed form containing the following particulars:—

(*a*) The business name;
(*b*) The general nature of the business;
(*c*) The principal place of business;
(*d*) Where the registration to be effected is that of a firm, the present Christian name and surname, any former Christian name or surname, the nationality, and if that nationality is not the nationality of origin, the nationality of origin, the usual residence, and the other business occupation (if any) of each of the individuals who are partners, and the corporate name and registered or principal office of every corporation which is a partner;

(*e*) Where the registration to be effected is that of an individual, the present Christian name and surname, any former Christian name or surname, the nationaliity, and if that nationality is not the nationality of origin, the nationality of origin, the usual residence, and the other business occupation (if any) of such individual;

(*f*) Where the registration to be effected is that of a corporation, its corporate name and registered or principal office;

(*g*) If the business is commenced after the passing of this Act, the date of the commencement of the business.

Where a business is carried on under two or more business names, each of those business names must be stated.

Every individual of firm liable to Registration under this Act, must in addition to Registration have mentioned on all Trade Circulars, Catalogues, Showcards and business letters, on or in which the business name appears:

(*a*) In case of an individual, his present Christian name or the initials thereof and present surname, any former Christian name or surname, his nationality if not British, and if his nationality is not his nationality of origin his nationality of origin; and

(*b*) In the case of a firm, the present Christian names or the initials thereof and present surnames, any former Christian names and surnames, and the nationality if not British, and if the nationality is not the nationality of origin the nationality of origin of all the partners in the firm or, in the case of a corporation being a partner, the corporate name.

This Act, therefore, affects every firm (other than a Limited Company) carrying on business under any other name than that of the Proprietors or Partners:—

For instance, anyone trading as the "Workwell Laundry" would not be complying with the Act. The title should be "Workwell Laundry" (A. Smith, Proprietor) or

A. Smith
B. Jones
C. Robinson } Proprietors.

Limited Companies are affected by the Companies (Particulars as to Directors) Act, 1917.

Under this Act every Limited Company formed subsequent to the 22nd November, 1916, must furnish to the Registrar of Companies on the prescribed Form, such particulars of every Director of the Company as would have been required to be furnished if they were partners in a private Firm.

All such Limited Companies are also required to give on all Trade Circulars, Catalogues, Showcards and business letters, the same particulars of every Director as would be required if they were partners in a private firm.

Members should, therefore, see to it—(1) That their businesses are duly registered, and (2) That the necessary information is given on all Stationery, Price Lists, Washing Books, Notepaper, Bill Heads, etc., also on Shop Fronts in the case of Depots.

The Fees for Registration are limited to five shillings for any one statement. The principal penalties are as follows:—

(*a*) For non-registration, £5 per day.

(*b*) For failing to keep exhibited in a conspicuous place the Certificate of Registration, a fine of £20 on summary conviction.

(*c*) For failing to comply with the section requiring names of proprietors and partners to be mentioned on letter headings, etc., a fine of £5 for each offence on summary conviction.

Copies of the two Acts can be obtained from H.M. Stationery Office, Imperial House, Kingsway, W.C., price 2d. each, plus postage.

Those who take part in the Exchange of Costs say they are amply repaid for the time and trouble expended.

It would be worth <u>your</u> while to join in the Exchange also.

SIMON'S LESSIVE

ESTABLISHED OVER 60 YEARS.

The Complete Washing Powder Has stood the Test of Time!

No Soap required, all that is necessary is contained in the material.

When washing with soap and soda in 999 cases out of 1,000 too much soap is used, consequently expensive material is wasted. Many rinses have to be given to get the soap out of the linen again or bad colour will result.

Use SIMON'S LESSIVE and AVOID all this trouble and save labour and costs.

Simon's Lessive has no injurious effect upon the Linen, it has been awarded the Certificate of the Institute of Hygiene.

Send for free working sample and full particulars and try it for yourself. Our representative will call and demonstrate.

You can see Simon's Lessive in actual use. Give us a call and examine the quality of the work.

SEE IT IS SIMON'S LESSIVE.

Notification of Accidents.

INSTRUCTIONS.

1. Where there occurs in a Factory or Workshop:

(*a*) an accident causing loss of life to a person employed therein:—

or

(*b*) an accident due to
- machinery moved by mechanical power;
- molten metal;
- hot liquid;
- explosion;
- escape of gas or steam;
- electricity;

and so disabling any person employed therein as to cause him to be absent throughout at least one whole day from his ordinary work; or

(*c*) an accident from any other cause, disabling for more than 7 days a person employed therein from working at his ordinary work; or

(*d*) a dangerous occurrence of the kind named below, which is not reportable under *a*, *b* or *c* above as an accident:

bursting of a revolving vessel, wheel, emery wheel, or grindstone moved by mechanical power;

breaking of a rope, chain or other mechanical appliance used in raising or lowering persons or goods by aid of mechanical power;

fire affecting any room in which persons are employed and causing complete suspension of the ordinary work therein for not less than 24 hours; whether causing personal injury or disablement or not,

the occupier must forthwith send notice thereof on Form 43 to the Inspector of the District.

2. If an accident notified as above as causing disablement results in the death of the person disabled, the occupier must send to the Inspector of the District notice of the death as soon as it comes to his knowledge.

3. If the occupier is not the actual employer of the person killed or injured by an accident as above, the actual employer must immediately report the accident to the occupier.

NOTE.—In the case of a fatal accident it is important that investigation should take place with as little delay as possible. Consequently immediate intimation to the Inspector by telegram or telephone is very desirable. A full report on Form 43 must also be sent.

4. Boiler explosions must also be reported by the occupier directly to the Board of Trade, whether causing personal injury or not.

It should be noted that it is not now necessary to notify the Certifying Surgeon of accidents. It is only necessary to notify the District Factory Inspector.

VULITE PREPARATIONS.

OXYGENATED LINEN POWDER.

A pure, high-grade soap powder for high-class work.

KLENBRYTE.

A specially blended powder for flannels and woollens.

SOPOLENE.

An economical and effective washing powder for an all-round trade.

KLENSAL.

A high-grade soap builder for use in machine or copper.

ALL PRICES ARE RIGHT.

They keep the whites white, and colours bright—and no additional soap is required

VULITE TUB SOAP.

A first-class Laundry Soap, made from the purest and finest material procurable. Guaranteed not to injure most delicate fabrics.

To save the cost of labour in barring and casing, it is put up in 4-cwt. casks and 1-cwt. kegs.

Why melt money dissolving bar soap when you can save it by using VULITE TUB SOAP?

VULITE BOILER FLUID.

A powerful concentrated scale remover. Contains no acids, alkali or any other injurious ingredient which would injure the plates or fittings. Does not prime, does not contaminate the naked steam, and is the cheapest and most effective Boiler Fluid on the market.

ALL LAUNDRY AND ENGINEERING REQUIREMENTS SUPPLIED AT KEENEST TRADE PRICES.

Taxes on Motor Vehicles.

The Finance Act, 1920, states that:—

On and after the first day of January, 1921 "there shall be charged, levied and paid in Great Britain and Ireland in respect of mechanically propelled vehicles *used on public roads*, duties of excise at the rates specified in the Second Schedule to this Act."

The words in italics above show that it is only vehicles that are USED that must be paid for.

The following is the scale of licences for Commercial Goods Vehicles constructed or adapted for use and used solely for the conveyance of goods in the course of trade (including tricycles exceeding 8-cwt. unladen):—

	Licence Fees. *Annually.* £ s. d.	*Quarterly.* £ s. d.
Electrically propelled, and not exceeding 25-cwt. in weight unladen	6 0 0	1 16 0
If not Electrically propelled as above:—		
Weight unladen.		
Not exceeding 12 cwt.	10 0 0	3 0 0
Exceeding 12-cwt. but not exceeding 1 ton ..	16 0 0	4 16 0
Exceeding 1 ton but not exceeding 2 tons	21 0 0	6 6 0
Exceeding 2 tons but not exceeding 3 tons ..	25 0 0	7 10 0
Exceeding 3 tons but not exceeding 4 tons ..	28 0 0	8 8 0
Exceeding 4 tons	30 0 0	9 0 0
If used for drawing Trailer (additional duty) ..	2 0 0	0 12 0

All weights are unladen weights, *i.e.*, stripped of spare wheels, water, fuel accumulators and loose details and loose equipment.

Licences to expire 31st December (Annual Licences) and Licences to expire at the end of any Quarter (Quarterly Licences) may now be taken out for lesser periods than a Full Year or Full Quarter respectively.

To obtain a Licence. Full particulars of the necessary procedure and of the various regulations in connection therewith were given in the 1921 Handbook, to which Members should refer. The following particulars as to Number Plates should be noted:—

Number Plates for commercial vehicles or private cars must be of the prescribed dimensions:—

(1) All letters and figures must be $3\frac{1}{2}$ inches high; every part of every letter and figure must be $\frac{5}{8}$ inch broad; and the total width of every letter or figure, except the figure 1, must be $2\frac{1}{2}$ inches.

(2) The space between adjoining letters and figures must be $\frac{1}{2}$ inch. There must be a margin of $\frac{1}{2}$ inch between the top and bottom of the letters and figures and the top and bottom of the plate, and a 1 inch margin at the sides of the plate.

(3) The letters and figures must be white on a black plate.

(4) The letters and figures may be painted on the vehicle, but should not be painted on the radiator.

(5) The letters and figures must always be easily distinguishable.

There are heavy penalties for fraud, misrepresentation, obscuration of the licence or registration number.

The new system of taxation does away with all petrol rebates, but does not affect driving licences, which are still required.

National Health Insurance.

The Provisions of this scheme are contained in the National Health Insurance Acts of 1911, 1918 and 1920, copies of which can be obtained from H.M. Stationery Office, Kingsway, W.C.2, at 1/3, 3d., and 3d. respectively. The Acts provide for the compulsory insurance of practically all employees between the ages of 16 and 70 (including married women). This also includes casual or temporary workers employed for purposes of the employer's trade or business.

The following are, amongst others, exempt from Insurance:—

(1) Persons employed as apprentices without money payment.
(2) Persons employed by their parents without money payment and persons who are fully maintained by their employer without money payment.
(3) Wives employed by their husbands and husbands employed by their wives.
(4) Persons **other than manual workers,** paid at the rate of more than £250 per annum. All manual workers must however be insured whatever their rate of pay.

Applications for Exemption may also be applied for on the following amongst other grounds:—

(1) Being in receipt of any pension or income of the annual value of £26 or upwards not dependent on personal exertions; or

(2) Being ordinarily and mainly dependent for livelihood upon some other persons.

It should be noted that even in cases where an Employee has obtained a certificate of exemption the Employer must still pay a contribution of 5d. per week in respect of the employee.

Rates of Contribution.

	Men.		Women.	
	Employer.	Worker.	Employer.	Worker.
Workers between 16 and 18, whatever rate of remuneration	5d.	5d.	5d.	4d.
Workers 18 and upwards:				
(*a*) where remuneration exceeds 4/- per working day, or where Board and Lodging are provided, whatever the rate of remuneration	5d.	5d.	5d.	4d.
(*b*) where remuneration is between 3/- and 4/- per day	6d.	4d.	6d.	3d.
(*c*) where remuneration does not exceed 3/- per day	10d.	—	9d.	—

Benefits.

	Men Per Week.	Women Per Week.
Ordinary rate of sickness benefit ..	15/-	12/-
Sickness benefit (before 104 payments)	9/-	7/6
Disablement benefit	7/6	7/6
Maternity benefit	40/-.

Unemployment Insurance.

Under the Unemployment Insurance Act 1920, compulsory unemployment insurance was extended to practically all persons coming within the scope of the National Health Insurance Act. (See page 65.)

The principal distinction is in the case of workers over 70 years of age, who are not insurable under the Health Insurance Act, but are insurable under the Unemployment Insurance Act, unless they are in receipt of Old Age Pensions.

Apart from this the various regulations as to the classes of workers to be insured, exemptions, etc., are substantially the same as in the case of the Health Insurance Act.

As from the 6th of April, 1922, the rates of contribution are as follows:—

	Employer.	Worker.
Men	10d. ..	9d.
Women	8d. ..	7d.
Boys	5d. ..	4½d.
Girls	4½d. ..	4d.

These rates incorporate the payments previously required to be made under the Unemployment Insurance Acts 1920 and 1921 and the Unemployment Workers (Temporary Provision) Act, 1921.

Unemployment Benefit is now at the rate of 15/- per week for men and 12/- per week for women, with an additional 5/- in respect of a dependent wife or husband, and an additional 1/- for each dependent child.

Contributors under 18 are only entitled to half the full rate of benefit.

Employers should note that they are now required to pay the whole of the Employer's share of the contribution as above in all cases where employees have obtained a certificate of exemption.

Books to be Read.

Up to the present there has been a lack of technical books dealing with the Laundry Industry but that want is now being supplied gradually. We strongly recommend every member of the Federation to purchase the following:—

"Modern Laundry Work," by Ellis Clayton. Price 12/6 plus postage 1/-. This is a well bound volume of 366 pages containing a mass of valuable information. Every laundryman will learn a great deal from its perusal. It can be obtained direct from the Publishers, Messrs. Simpkin Marshall Hamilton Kent & Co., or from the Federation Offices, plus postage.

"The Conservation of Textiles," by H. G. Elledge and Alice L. Wakefield. Price 6/- including postage. This book is published by the Laundryowners' National Association of America, and is the outcome of the work done by its Research Department. It contains a great deal of information and should be useful in explaining to customers the various faults in manufacture for which laundrymen are generally blamed. The illustrations are particularly good.

"Cottons, Linens, Woollens, Silks," by H. B. Heylin. Price 3/- plus postage, 5½d. Mr. Heylin is one of the leading authorities on textiles in this country. The book is quite a small one and contains explanations of the various kinds of fabrics It is strongly recommended by our Fabrics Investigation Committee.

"Manual of Standard Practice for the Power Laundry Washroom," price 6/-, including postage. This is another publication of the Laundryowners' National Association of America. It shews how much can be done in the direction of standardization of processes as the result of scientific research. It is strongly recommended by our Fabrics Investigation Committee.

Alteration of the Articles of Association.

THE ARTICLES OF ASSOCIATION, altered at an Extraordinary General Meeting of Members held at the North British Station Hotel, Edinburgh, on the 12th May, 1922, and confirmed at a Second Extraordinary General Meeting held at Bank Chambers on the 29th May, 1922.

The Alterations are Underlined.

The Articles which are altered should now read as follows :—

ARTICLE 6, SUB-S. 2 (c) :—

The National Council may admit to the honorary membership of the Federation any person who retires from business, who has been an Ordinary or an Associate Member of this Federation, and who has been at some past time a President of the former National Federation of Laundry Associations, Limited, or of this Federation for not less than one year, or any official of a laundry federation or association, or of any dyers or cleaners federation or association of similar trades in the United Kingdom or elsewhere, or any person who has acted as President or Vice-President of such federation, or any person who in the opinion of the National Council has rendered important services to the laundry, dyeing or cleaning industries in the United Kingdom or elsewhere, or any other person whom the National Council shall deem eligible, and no such official of a federation, association or person so admitted shall be required to sign the application mentioned in Article 11 hereof or to pay any subscription or entrance fee. All the aforesaid past Presidents of the former National Federation of Laundry Associations, Limited, and of this Federation shall be automatically nominated for Honorary Membership and, in the event of nominations exceeding the maximum hereinafter mentioned, shall take precedence of all other nominations. Any such official of a federation, association or person shall be entitled to attend meetings of this Federation, and shall be entitled to all the benefits of membership, but shall not be entitled to vote or serve on any Committee or Council unless a past President of the former National Federation of Laundry Associations, Limited, or of this Federation, except as hereinafter provided.

NOV 6 1922

CARROW WORKS, NORWICH.

Provided nevertheless that the National Council may in its absolute discretion at any time, or from time to time,* also give rights of voting to other Honorary Members, and also such rights of serving on Committee or Councils as hereinafter mentioned. Such Honorary Members shall retire at the next Annual Meeting of the National Council but shall be eligible for re-election. The total number of Honorary Members shall not at any time exceed Five per cent. of the then total number of Trade Members of the Federation.

*The words "give rights of voting to the Honorary Members or any of them," have been deleted and the words as underlined inserted.

Provided always except as hereinafter mentioned all Members representatives and corporate bodies being Trade Members must have a British qualification, that is to say, a Trade Member must be a British subject or a corporate body registered in Great Britain or Ireland or having a Charter from the Government of these countries and in all cases where capital is divided into shares having three-fourths of the issued capital owned by British subjects in their own right.

ARTICLE 24: Add the following clause:—

There shall be a National Council which shall consist of representatives to be elected by the District Councils as herein provided. In addition the Annual Meeting of Members or the National Council itself shall at its Annual Meeting in each year co-opt as additional members of Council any person who has been or is a member of this Federation and who has been at some past time President of the former National Federation of Laundry Associations, Limited, or of this Federation for not less than one year.

ARTICLE 27:—

There shall be a President and four Vice-Presidents of the Federation (or such other number as may be decided by the National Council). Only members of the National Council are eligible to Honorary Offices of the Federation or to membership of the Executive thereof, except that any member of the Federation may be elected Honorary Treasurer and shall in such case be entitled to membership of the Executive.

ARTICLE 53:—

The Members of each District Council shall at their first meeting elect their Committee which shall consist of a Chairman,* and such other Honorary officers or persons as the Members of such District Council may

* The words "an Honorary Treasurer and" have been deleted from this clause.

determine, and thereafter the power of appointment of the officers and the Members of the Committee all of whom shall be Honorary shall be vested exclusively in the Members of the District Council concerned. Provided always that no person shall be eligible as an officer or as a Member of the Committee of any District Council who is not a Member of the District Council.

The following Article should be added after Article 55 as:

ARTICLE 55A:—

Notwithstanding the aforesaid provisions in these Articles contained, in cases in which the District Council shall consist of not more than six persons the representatives of such District upon the National Council shall be elected by the Members of the Federation in such District at a Special Meeting convened for the purpose in lieu of the provisions for election of such members by the District Councils as hereinbefore contained.

ARTICLE 56:—

The National Council shall meet at least twice a year. Provided always that a meeting of the National Council shall be held every year as near to the Annual General Meeting of the Federation as possible, preferably on the day previous, or on the same day at an earlier hour, at which meeting of the National Council aforesaid, the Members thereof shall elect a President, four Vice-Presidents, an Honorary Treasurer, and eight other Members of the Federation, or such other number of Members as may be decided by the National Council, to constitute the National Executive of the Federation who shall take office immediately after the ensuing Annual General Meeting of the Federation, unless the Annual Meeting of the National Council be held after the General Meeting of the Federation, in which case the National Executive elected thereat shall take office immediately after such appointment. The existing officers or other members of the National Executive shall be eligible for re-election, but if not re-elected shall retire immediately after the Annual General Meeting of the Federation.

ARTICLE 57 to be deleted.

"BRIMAL"

MALT EXTRACT specially prepared for Laundry use.

WASH-HOUSE.

"BRIMAL" ensures the clearest colour to collars, etc., entirely doing away with the yellowing and blisters. It will clear the old dressings from all classes of starch dressed goods.

Woollens and flannels—including old calender and shirt machine felts—obtain a wonderful soft finish when washed with "BRIMAL."

Chintzes and Cretonnes should be washed with "BRIMAL" as it has a brightening effect upon the colours.

DYE-HOUSE.

All goods—whether woollen, flannel, cotton or linen—should be treated with "BRIMAL" prior to the dyeing process, as this will open the pores and thus enable much better penetration during the dyeing.

STARCH-ROOM.

"BRIMAL" is specially recommended for dextrinising starch.

The British Malt Products Co.,

1, MARKET STREET, BERMONDSEY,

'Phone : HOP 5587. LONDON, S.E. 1.

ARTICLE 61:—

The Executive of the National Council (hereinafter called "The National Executive") shall consist of the President of the Federation, the immediate past President, the Vice-Presidents, one of whom may or may not be the immediate past President, an Honorary Treasurer, and eight other Members or such other number as may be determined by the National Council, all of whom excepting the Honorary Treasurer shall be persons who are already members of the National Council and are elected to serve on the National Executive by the National Council.

ARTICLE 72:—

The National Council may meet together for the dispatch of business, adjourn and otherwise regulate their meetings and proceedings as they think fit, and may determine the quorum necessary for the transaction of business. Until the National Council otherwise determine* one-third of the actual members of the National Council for the time being or the nearest number thereto, not exceeding one-third, shall be a quorum, and meetings shall be held at least twice in every year.

* The words: "Twenty members," have been deleted and words as underlined inserted.

Things which all Launderers OUGHT to do.

Insure adequately against all risks, such as Workmen's Compensation, Fire, Burglary, Third Party, Motor and Horse Vehicles, Loss of Profits, etc.

Review all Insurance Policies annually with a view to any necessary alterations in the amounts insured.

Keep exact records regularly of Output and Departmental Costs.

Take part in the Official Exchange of Costs and thus learn the possibilities of more economic working. See page 35.

Join the B.L.R.A. and thus obtain the latest scientific information regarding Laundry Methods. See page 81.

See that the Revised Rules and Regulations as adopted by the Federation are in all Washing Books and are prominently displayed in Receiving Offices. See page 47.

Read the FEDERATION JOURNAL promptly and regularly.

Pay the Annual Federation Subscription early in each financial year.

Attend the Annual Congress, Local Conferences and all Meetings of the Local Section.

High-class LAUNDRY MACHINERY

LAUNDRY ENGINEERS,

NOTTINGHAM.

LONDON OFFICE: 41 & 42, Parliament Street, Westminster, S.W.1.

Things which all Launderers MUST do.

Display in a prominent position in their Works the Factory Act Abstract and Trade Board Proposals and Orders.

Enter on the Abstract the cubic capacity of each room and the number of persons it is permissible to employ in each.

Notify the Factory Inspector of the normal working hours of the Laundry, and also when it is desired to make any change in the working hours.

Stamp each week National Health and Unemployment Insurance Cards, making the necessary deduction from the wages.

Keep a record in the wages book of all deductions of this kind so that when the various Inspectors call to investigate, everything will be straightforward for them.

Notify certain Accidents. **See page 61.**

Comply with the obligation of the Registration of Business Names Act. **See page 57.**

Provide facilities for drinking water, lavatories, seating accommodation, messroom, etc., in accordance with the Laundry Welfare Order. **See page 53.**

Make a return in the prescribed form of all wages paid over £130 per annum, if requested to do so by the Inspector of Taxes.

Keep register of special overtime worked in Form No. 12 which can be obtained from the District Factory Inspector.

Advise Factory Inspector at least fourteen days in advance of days to be substituted for Statutory Holidays under Clause 35 of the Factory Acts. Use form 34.

Pay wages in accordance with Trade Board Orders except in those cases in which Permits of Exemption have been obtained from the Laundry Trade Board.

Comply with the Regulations for Registration and Taxation of Motor Vehicles. **See page 63.**

Obtain Medical Certificates of fitness from the Certifying Surgeon for all young persons (*i.e.*, **those up to 16 years of age) before employing them. For particulars of fees see page 51.**

If it is desired to treat certain departments as separate factories for the sake of different working hours, permission must first be obtained from the Factory Inspector.

34, Mark Lane,
London, E.C.3. 1st June, 1922.

Dear Sirs,

Three years ago, at Harrogate, when Dr. Dorée sounded the slogan of "The British Launderers' Research Association," he at some length discussed the subject of malt extract for use in the laundry.

What a field lies fallow for research under the simple name of malt extract! Doctors and chemists, brewers and bakers, textile workers and laundrymen—these, and many others, not forgetting the infant animals human and other kinds, are awaiting a clear definition of the power of the wonder-working family of enzymes, known to the ordinary layman as "diastase."

Why does a laundryman hesitate to use malt extract? Is he afraid of it, or is it rather that he fails to understand how such a product combines with starch to form a liquid which is neither malt nor starch?

The "MUNTONA" MALT EXTRACT, prepared specially for laundry use, is far ahead of the older fashioned brands that were on the market before the War. The high starch converting power of "MUNTONA" is concentrated free of the clogging hindrance of the heavy and inactive dextrin common to the older extracts. By "MUNTONA" the clearance of the old starch in the breakdown of soiled linens is therefore immediate and complete.

The "MUNTONA" is sold in 1-cwt. drums at 64/- per cwt.; in ½-cwt. drums at 33/- each; and in trial tins—sufficient for 50-loads of linen—at 12/6 each; and carriage paid.

Yours faithfully,

MUNTON & BAKER (BEDFORD) LTD.

British Launderers' Research Association.

Dear Sir, or Madam,

If you are contemplating an outlay, however small, by way of installing a Single Machine, reorganising the present arrangements in your Laundry, negotiating Purchase or Sale, or are in any difficulty whatever regarding the future of your business, we are, by virtue of our experience, in the unique position of being able to advise you in any department.

Where to buy, and whom to employ, to your monetary advantage, will be our chief concern.

We hold no brief for any manufacturer, or his products, but will treat your case on its merits, and view it from an impartial standpoint.

From our personal experience, we are convinced there is a great need for a personal service of the kind we are now offering.

To secure your confidence will be our utmost endeavour.

We are convinced that there is particular need for the service we offer.

To secure your confidence will be our endeavour.

Yours faithfully,

STEELE BROS.

NOTES ON THE B.L.R.A.

The rate subscription, which was originally fixed at 2/- per worker per annum guaranteed for five years, was altered at the Annual General Meeting of Members to 2/6 per worker per annum guaranteed for four years for those joining after the expiration of the first financial year.

The income from subscriptions for the year ending 30th September, 1921, was £2,504 3s. 0d. to which must be added a similar amount, the grant from the Department of Scientific and Industrial Research. For the second year the subscription income so far is at the rate of £3,107 2s. 6d., which sum the Department also pays.

The difficulties in the way of finding suitable premises for a Laboratory have not been altogether unexpected (other Research Associations have had similar experiences) but they have certainly been disappointing. Nevertheless, work has been commenced in temporary premises and at the Borough Polytechnic Institute, where a junior research assistant is working under Dr. Charles Doree. Dr. E. C. Edgar had been appointed Chief Research Assistant and is busily occupied in preliminary work which will render progress much more rapid when once the Laboratory is fitted up. Other assistants will be appointed as soon as there is work for them to do.

The first Report to Members has just been issued. It is a most interesting document, not only useful in itself, but opening up possibilities for most useful work. The information given proves the necessity for Scientific Research, and offers most encouraging prospects of early results of a very useful character.

We advise all members of the Federation who have not yet done so, to apply for membership of the Research Association at once. To stop outside this movement is an expensive economy which no laundryowner can afford to indulge in . . . . . .

The Preparation of Cloth.

[*In view of the constant complaints that Laundry processes are the cause of the loss of colour and other forms of deterioration in fabrics the following article by an independent authority should be useful as showing how easy it is for manufacturers to make mistakes, for which laundries would be blamed afterwards.*

We are indebted to the Editor of the "Manchester City News" for permission to reprint in full the article which he published on April 29th, 1922.]

A paper of great practical utility to finishers was submitted to the last meeting of the Manchester section of the Society of Dyers and Colourists. It was entitled "The preparation of cloth for finishing," and was read by Mr. S. H. Higgins (Bleachers' Association, Limited), who, with Mr. Andrew Hodge (Calico Printers' Association, Limited), had prepared it, and was supplemented by an address from Mr. Hodge and by explanations, illustrated on the screen, by Dr. C. S. Harland, of the Shirley Institute, Didsbury.

Impediments to Good Results.

The faults in cotton piece-goods which hamper the finisher in his attempts to produce the best result are (the paper recorded), roughly, cotton faults, mechanical faults, and chemical faults, including those associated with the size. Regarding cotton faults, it was stated that "black" cotton could not be bleached to a pure white, the finished piece being dull and almost grey in appearance. Cloth woven from such "black" cotton should never be delivered to white finishers or calico printers, but should be sent for black dyeing. Blue Bender cotton is a variety of Peeler cotton, and had a blueish colour which could not be removed by the usual methods of bleaching. The name is given owing to the fact that it grows in the bends of the Mississippi River valley. Some authorities are of opinion that its coloration is brought about by premature frost, while others think it is due to some ingredient in the soil. Apart from its colour and resistance to bleaching, the appearance and quality of the fibre are unimpaired. The United States Department of Agriculture finds that middling tinged cotton, when bleached, can be used for dyeing both light and black shades, but good middling blue stained and middling blue stained can only be bleached satisfactorily for dyeing dark shades.

Unripe fibres are responsible for spinning difficulties resulting in the formation of neps resisting the penetration of the colour. Many cloths, particularly those woven with the coarser counts of yarn, contain a very large proportion of leaf, which remains from a pale buff yellow to dark brown after the goods have received a normal bleach. This is a very objectionable feature in many styles, and at its worst leaf is also capable of showing speckiness in the ultimate dyed goods, as illustrated in one of the examples.

Some Mechanical Faults.

The mechanical faults took the form of unevenly spun yarns, uneven weaving, floats, etc., the most outstanding of them all being probably uneven weaving, which gives alternatively thick or thin places in the weft, or reediness in the warp, and which, although in many cases hardly noticeable in the grey, show up in the ultimate dyed or printed goods as light and dark places, constituting what is known as streaminess. A defective sand roller on a loom sometimes causes minute holes in the cloth, which are enlarged in the bleaching process. The temple of the loom causes similar holes, but at the sides of the cloth, while the grey plaiting machine also causes damage from time to time. These damages in the form of small holes are difficult to trace to their source. Pins, teeth of steel combs, hairpins, etc., left in cloth by weavers cause stains and tears. It is quite

10, Allen St., Lower Broughton, MANCHESTER.

customary to find heddle wires in calenders from goods woven in Jacquard looms, thus causing small round holes to be cut in the cloth going through the calenders. Cropping machines sometimes cause small holes by pulling bits of cloth out along with the loose threads, and can also damage cloth by the blades not being properly adjusted.

Structure of the Selvedge.

The paper also dealt with the structure of the selvedge, which was a matter of importance to the finisher. In some cases a curling selvedge rendered printing, dyeing, and finishing difficult, if not practically impossible. In order to obtain certain finished effects a definite process must be followed, and the cloth must have a definite large number of runnings, but if finishers give more runnings to the cloth than is absolutely necessary the cost of production is too high. If selvedges are hard and round, instead of having a flat tape appearance, they are liable to cut or tear away from the body of the cloth, and if the threads in the selvedge are badly drawn they tend to form a hard, solid, selvedge which may be an advantage in weaving, but give trouble when calendered. Irregularity in the manner of threads in a selvedge caused by bringing in loose ends will sometimes cause damage in those places where extra threads have been introduced. There would be little trouble with faulty selvedges if the wholehearted co-operation of the mill manager could be obtained.

The Use of Chemicals.

With regard to chemical faults, including those associated with size, these took the form of excessive quantities of size being used, and from the use of undesirable ingredients in the size, such as zinc and magnesium chlorides, paraffin wax or tallow containing paraffin, and from the use of colouring matters which cannot be bleached out. All the size put into the warp has to be removed by the finisher during the process of bleaching, and the less he has to remove the better. Many clothes are now delivered free from chlorides, though some of the ready-made softeners sold for use in sizing contain chlorides, and a manufacturer buying such products might be using them unwittingly. The use of china clay in sizing light goods is also not to be recommended. Fatty matter in the size is a fruitful source of trouble to the finisher, even when it consists of pure tallow, which is mainly saponifiable. Some cloths contain as much as 2·5 per cent. of fatty matter, while other similar cloths contain only 0·6 per cent. Many commercial tallows are adulterated with unsaponifiable paraffin wax, which is not removed in the process of bleaching, and gives rise to stains in the finished goods. Japan wax, being only partially saponifiable, is not suitable for sizing mixings. Paraffin and similar waxes should not be allowed in the weaving shed. The practice of covering up a float or other weaving defect with paraffin wax, or soap containing it, is also to be deprecated.

Stains Due to Oil.

Stains due to mineral oil are another difficult problem from the point of view of the finisher. They occur when there is contact with the yarn or cloth in the course of spinning or weaving, from drippings from the roof or from the slasher cylinder covers, yellow or black bars from cracked bobbins, the oil getting on to the roving, or oil from the roller necks, and in the top boards in the card room. When the weaver pieces a thread an oil stain will result if she has oil on her fingers, and this stain cannot be removed in the ordinary bleaching process. Marks from picker bands due to oily and waxy matters in the stuffing of the leather will not come out, but leave yellow marks.

If lubricating oil has come from a bearing and contains any copper or iron from the machinery the trouble is greatly aggravated. The metallic particles are not completely removed by scouring, and act on the chemic, giving off oxygen, thus tendering the cotton with which they are in contact. It is an exceedingly dangerous practice to attempt to remove these metallic stains by treatment with oxalic acid or salts of sorrel. If the acid

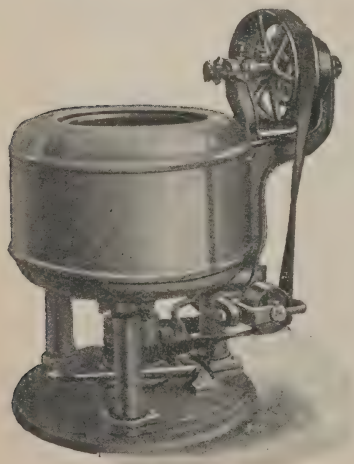
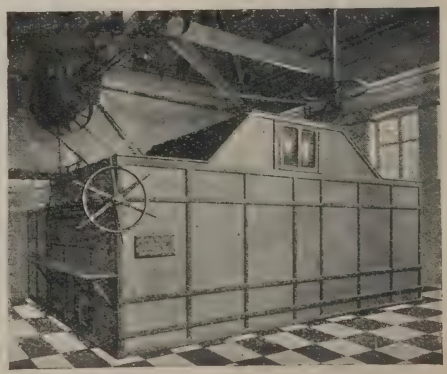
ESTABLISHED 1875.



NEW CATALOGUE N.F.L. SENT ON APPLICATION.



is not completely removed by washing, local, and perhaps more than local, tendering may occur. Lard oil is saponifiable in the bleaching process.

Some years ago it was shown that by using a lubricating oil containing 75 per cent. of colza oil and 25 per cent. of mineral oil any oil stains would be removed in the bleaching process. White lead stains from looms and other parts of the textile machinery will not bleach out, but leave light brown stains. The bleeding of dyestuffs in the bleaching process also causes a considerable amount of trouble. It is more likely for variations to take place in the process of dyeing, which is sometimes a long and difficult one, than in the process of bleaching, which is more or less standardised.

Inferior Gold.

Difficulties also occur when "gold headings" have to be dealt with by the bleacher. There appear at times to be variations in the quality of the gold thread, blackening of the thread and the tendering and destruction of adjacent cotton threads. Manufacturers have at times bought inferior gold which would not stand the bleaching process. Instead of being a drawn silver wire with an extremely thin coating of gold it has sometimes been a gilt copper wire. If attempts are made to remove foreign matters, such as paraffins, by more drastic methods of bleaching the finisher runs two serious risks; first, that of rendering his cloth unsuitable for the finished effect required, and; second, of weakening or actually rotting the cloth. Otherwise the finisher is continually attempting to remove all foreign matters as completely as possible.

The finisher ought to insist that no chlorides or unsaponifiable waxes shall exist in the cloth he receives. As to stretching goods to width it must not be forgotten that there is a certain amount of stretch which can be given to fabrics beyond which the strength of the fabrics is decreased.

Marking Room of Maidenhead District Laundry, Maidenhead.

The above installation includes three Improved No. 8 National Power Marking Machines, one Rose Label Machine (for sewing marked tags on articles which should not take a mark direct) and a National Automatic Conveyor.

The Individual booth for each marker, by putting her in a "private office," allows for greater concentration on her work. Only in this way can the work be handled in a methodical manner so that in marking and listing, each piece is handled but once with no extra movements and waste motion.

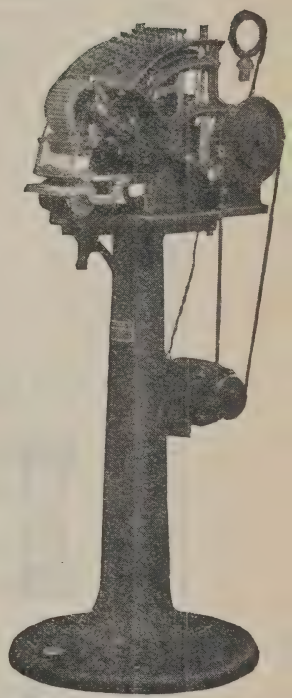
The conveyor takes all the marked work to one spot where an expert classifies it for the washing process.

By this equipment the Maidenhead Laundry was able to reduce the number of girls in marking and assorting departments from eleven (11) to six (6), thus making a tremendous saving in productive labor costs.

eyor Booth System

with a Minimum of Effort and Expense

The Improved No. 8
National Power Marking Machine



CONSTRUCTION. Is constructed of the best material obtainable, and will last for many years of constant usage and service.

OPERATION. Sets up like a typewriter, operates by foot pedal, is "cleaned" by the slight movement of a lever, and marks at the rate of 90 impressions per minute. It is automatically inked during each operation.

ACCOMPLISHMENT. Produces a mark of a uniform size, legibility and durability, as the head of the machine—driven by a $\frac{1}{8}$ H.P. motor—descends at the same rate and with the same force each time.

PEN-MARKS CANNOT COMPETE IN APPEARANCE OR SPEED

Soap, Luopan — Neutral, dissolves dirt from the fabric. Removes Paint, Tar and Grease in the Wash. Invaluable for Woollens, tends to prevent shrinkage.

„ Levildye — Use in the Dyebath prevents Colours going on unevenly. Faded garments can be dyed without showing.

„ Dry Cleaning (100% Solubility) — That is the reason it is so much better than any other. Use it on Whites, that is where you can tell. Best for Whites, then Best for all.

" Oppolt " — A concentrated Washing Powder, containing 10% of LUOPAN SOAP. No Caustic or Silicate in. May be used on Woollens, Silks, etc

" O-Blit " — A Bleaching Agent for Cotton, Wool or Silk. Removes Colour Stains. Must not be used on Prints or Colors. Can be used in the Washing Machines

" Polt " — An Oxygen Bleaching Agent in concentrated form. Makes a beautiful white. Can be used on Prints. O-BLIT and POLT used alternate weeks will prevent yellow necks round Collars.

Starch, Facile — Pure Rice Starch Crystals, in 4/5 lb. packets, ½ cwt. cases.

„ „ Combination — in 7lb. bags, in ½ cwt. cases.

„ Soluble — For Table Linen. This Starch after boiling will allow additional water to be added. Clothes will not stick to rollers. Specially useful for the Multiple Calender.

„ Transparent — This is twice as strong as any other Starch. Is a soluble starch, and allows additional water to be mixed with it. Useful for starching costumes, dyed material, Chintz. etc. Will not show even on Blacks. Will not yellow Whites when hot iron is used.

Glazing Powder — You can make your own Paste Glaze by simply adding cold water and stirring. Paste on collars, or add it to starch in machine.

As Different as Chalk and Cheese

Expresses the comparison between ordinary washing products and

MULSOID

A scientific scouring medium of entirely new character.

¶ It simply licks up dirt of all classes, greases, oils, paints, tars, waxes, resins, epidermal secretions, and exfoliations, road dust, &c.

¶ MULSOID *has the property of softening water*, works in hard water without the usual loss of soap substance. keeps lime in solution, and prevents loose basic colouring matters from marking off.

¶ Its highly extractive, adsorbtive, and dispersive properties are of fundamental importance to every launderer, dyer, and cleaner. It is a valuable sterilising medium

¶ Not a soda concoction, of which so many in the trade have had painful experience.

¶ *As beneficial upon the finest silks, prints, chintz cretonnes, and woollen goods, as upon the greasiest overall, garment, or preparation job for re-dyeing.*

¶ MULSOID works equally well *alone*, with soda, or with soap stock solutions.

Many shrewd laundrymen *have already proved the difference.*

Make YOUR Trial NOW !

Use Time, *and Water* wisely by employing Mulsoid.

Patented Home and Abroad, and manufactured by J. F. Moseley & Co., Manchester:

NAPSAGEN

PATENT

SPIRIT-SOAP COMPOUND

IN 4-LB. BARS.

Use NAPSAGEN for everything—Woollens, Coloureds, and Cottons. It entails no alteration of method; just substitute it for your ordinary soap and work on as usual. The only difference will be that costs will be lower and you will get your work a fine colour.

In NAPSAGEN a pure and powerful but harmless spirit is incorporated; this breaks up the dirt but leaves no smell. NAPSAGEN contains no Bleach or injurious Chemicals.

SEND FOR SAMPLE AND PARTICULARS TO THE MAKERS AND PATENTEES:—

The National Mutual Life Association of Australasia, Ltd.,

HEAD OFFICE FOR GREAT BRITAIN AND IRELAND:
5, CHEAPSIDE, LONDON, E.C. 2.

NOTABLE FEATURES.

1. The Association, which was established in 1869, is a purely Mutual Office and distributes the whole of the surplus amongst its Policyholders.
2. The Funds are over £15,000,000, the whole of which are invested in the British Empire.
3. The Rates of Premium are remarkably low and average 10 per cent. less than those of other Companies.
4. Bonuses at high rates have been consistently maintained, the amounts distributed amongst Policyholders as Reversionary Bonuses at the last three Investigations were: 1913, £1,100,000; 1916, £1,300,000; 1919, £1,450,000.
5. The business is conducted at a low rate of expense, the ratio for 1921 being only 15·1% of the premium income.
6. The average Rate of Interest earned on the Funds for the year ending 30th September, 1921, was £5 4s. 5d. per cent. (after deduction of Income Tax).

The Finance Committee of the National Federation of Launderers Ltd., after very carefully investigating the terms offered by this Association, recently took out a Policy with this Company.

For full particulars apply to the AGENCY MANAGER,

NO BUSINESS MAN CARES TO ORDER PRINTING

UNLESS

he is satisfied that he is getting value for money. During the past twelve months prices for printing have been like Easter—a movable feast—and precious little nourishment for either buyer or seller. BUT NOW that all our strike troubles are over and wages stabilised until December, 1923, the progressive laundryman may order all the advertising matter he can dispose of, with confidence that his money is being well and profitably invested.

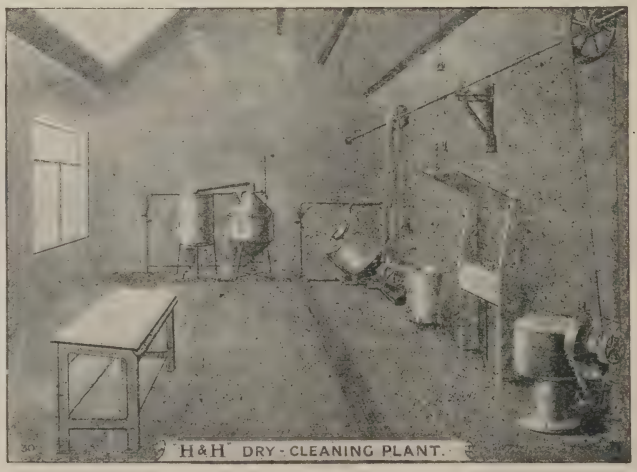
Send for Catalogue of Prices.

THE VERY BEST INVESTMENT

IS ONE OF OUR NOTED

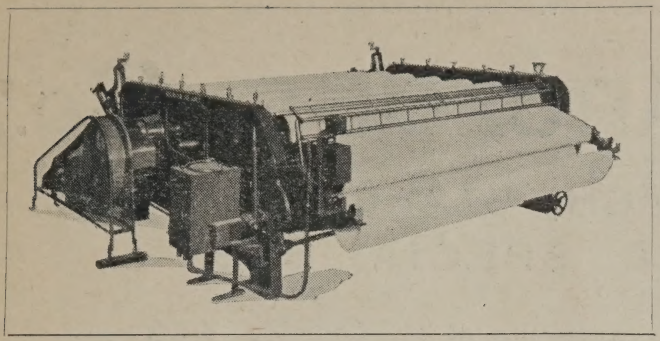
DRY CLEANING OR DYEING PLANTS.

Every Requisite for Dyeing and Cleaning Supplied.



We are also Makers of Complete Laundry Plants.

HILL & HERBERT, Ltd., ENGINEERS AND MACHINISTS, LEICESTER.



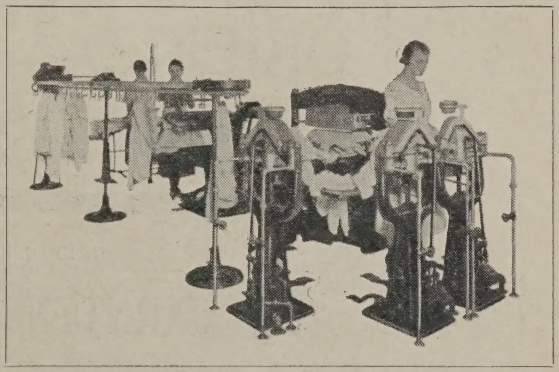
The New American "Float-Roll" Ironer

A complete ironing department in itself—irons everything in the family bundle, flat work, completely finished, clothes finished 80 to 90 per cent. A great money saver and money maker.

Creations—not Copies

EACH of these machines has been built and designed carefully, slowly and thoroughly, for its own particular purpose. They give proved performance and not mere promise. And behind these machines are the brains and experience that augurated them . . . . . .

If you are looking for new ways of creating new business and of making existing business more profitable, let us send you details.



The American Shirt-Finishing System

Three girls can finish and fold 40 shirts an hour on this machine. Think of the saving in time and wages
